CLAIMS

15

- 1. In a computer system having a display, a method for creating and using computer passwords, including the steps of:
- displaying graphic objects on the display;
 selecting at least one graphic object and designating it as a password;
 applying said password to a further graphic object, whereby said graphic object cannot function unless said password is first applied to said further object.
- 2. In a computer system having a display, a method for creating and using computer passwords, including the steps of:

displaying graphic objects on the display;

selecting a plurality of said graphic objects and designating them as a password;

- applying said password to lock and password-protect a further graphic object, whereby said further graphic object cannot be accessed unless said password is first used to unlock said further object.
- 3. The method of claim 2, wherein said plurality of objects include at least one of the following categories of graphic objects: alphanumeric characters, recognized hand drawn graphic objects, freeline hand drawn objects, and pictures.

4. The method of claim 2, wherein said plurality of objects include more than one of the following categories of graphic objects: alphanumeric characters, recognized hand drawn graphic objects, freeline hand drawn objects, and pictures.

5

- 5. The method of claim 2, wherein said plurality of objects are each displayed in a respective color.
- 6. The method of claim 5, further including at least two distinct color
 palettes, each of said plurality of objects having a respective color selected from said color palettes.
 - 7. The method of claim 6, wherein one of said color palettes displays 34 colors.

15

20

- 8. The method of claim 7, wherein the other of said color palettes displays millions of colors.
- 9. The method of claim 4, wherein the combinatorial possibilities of said password includes the categories of said plurality of objects, the colors of said plurality of objects, and the spatial arrangement of said plurality of objects.
- 10. The method of claim 2, wherein said step of designating as a password includes the step of accessing the Info Canvas of one of said plurality of selected

graphic objects and selecting the Make Password entry, whereby all of said plurality of selected graphic objects are incorporated into said password.

- 11. The method of claim 2, wherein said step of designating as a password
 also glues together all of said plurality of selected objects.
 - 12. The method of claim 2, wherein said step of applying said password includes the step of dragging said password to superpose on said further graphic object.

10

15

13. The method of claim 2, wherein the step of unlocking said password-protected further object includes the steps of displaying said further object, recalling or redrawing said plurality of objects that form said password, and dragging said plurality of object to superpose on said password-protected further graphic object.
